## Relevant Experience

Full-Stack Developer · **Self Employed** June 2023 — Present

- Studied to enhance my skills in modern programming languages and frameworks. This included JavaScript, TypeScript, React, Node.js with Express.js and Mongoose.js, Tailwind CSS, and MongoDB
- Focused on strengthening my foundational knowledge of programming concepts, data structures, and algorithms, and regularly practiced solving problems on LeetCode
- Created YoGato, a full-stack application that went live on March 2024
- Created a handful of small-medium sized projects on React and with pure Javascript to improve my foundational and creative skills

Solution Architect / Product Owner · **Customertimes USA** Mar 2022 — Jun 2023

- Designed and implemented a versatile litigation support platform, focusing on cost-efficiency and customization
- Collaborated closely with stakeholders and SMEs to thoroughly understand client requirements and business models
- Prioritized backlog items and directed business analysts, authored and approved user stories
- Led refinement sessions with team

Solution Architect · **Customertimes Latvia** Jul 2021 — Mar 2022

- Calculated project estimations and conducted preliminary analyses and planning activities to ensure accurate costs and timeline forecasts
- Researched and advocated the best technology stack for projects
- Laid out high level solution designs and proposed multiple approaches and compromises to accommodate budget and timeline limitations

Salesforce Architect · **CT Consulting** Jan 2020 — Jul 2021

- Worked closely with BAs to refine requirements and to design modular solutions
- Acted as proxy product owner and subject matter expert, enabling the team to have quick circumstantial business decisions and solutions
- Created and maintained architecture documentation
- Supported end-users and led production issue resolution

Salesforce Developer · **CT Consulting** Jan 2016 — Jan 2020

- Developed CRM business logic inside the Salesforce ecosystem using Visualforce, Aura, and Lightning Components, Apex Classes, Apex Triggers, and Apex Batches
- Created integration endpoints and implemented integrations with other systems and middlewares
- Executed production deployment and participated in setting up release pipelines

## Skills

### Programming languages

JavaScript, TypeScript, HTML, CSS, SQL

### Frameworks & Libraries

React, NodeJS, TailwindCSS, Material UI

### Tools & Platforms

Git, GitHub, Netlify, MongoDB, Adaptable, Figma, VSCode

## Selected Projects

### YoGato Web App

A full-stack application dedicated to Yoga. Features voice announcements, custom-made sequence timer, and support for both desktop and mobile

### Nueva Shop

A minimalist shopping cart implementation with ReactJS

### Nova Vista Cafe

Cafe website with a sleek parallax effect

## Education

### Lapland University of Applied Sciences

Bachelor of Business Administration

## Interests

Mythology, Ancient Greek philosophies, self-improvement and mindfulness practices, calisthenics, Russian literature, linguistics.
